

MEDICAL

ALMA PRO

Ref. EL07BPRO23SL.2.A66.GF

This newly designed table offers a wide range of functionalities for professionals. Whether performing drop, flexion, or distraction techniques, it provides the necessary tools. The adjustable head sections increase versatility. The tension controls and the removable T-bar flexion control allow free movement around the table, ensuring a smooth experience for both you and your patients.

Features:

- Electric height (Hi-Lo) and traction operation via foot bar and button.
- Head section: Padded support platform with adjustable width, gas spring lift headrest with a dynamic adjustment range of $\pm 20^\circ$ and vertically adjustable height of 10 cm, lateral headrest movement of $\pm 15^\circ$.
- Auxiliary straps included.
- Four drop sections: cervical, thoracic, lumbar, and pelvic.
- Motorized adjustable lumbar traction mechanism.
- Abdominal separation design: the thoracic section can be raised or lowered, making the treatment approach more diverse.
- Vertical tension control and horizontal flexion at the lower body via a T-bar.
- Reliable TiMOTION motor.
- 4 retractable wheels with a central locking mechanism, facilitating table transport.
- Height range of 56–90 cm in approximately 30 seconds.
- Padding thickness: 7.5 cm.
- Foam density: 100 kg/m³.
- Upholstery: fire-retardant PVC vinyl that meets BS 5852 requirements, resistant to stains, mold, and wear up to 150,000 cycles.
- Warranty: 2 years for the chassis, electrical components, and upholstery (except for misuse).
- Certifications: ISO13485 / MDR CE / FDA registered (USA).
- Load capacity: 250 kg.
