

PHYSIOTHERAPY & MASSAGE

JULL PRO

Ref. EL03PRO23.1.A66.GF

This short headrest treatment table provides a solid and stable platform for performing treatments. It features a gas-assisted backrest and head section, along with a smooth-operating Hi-Lo electric lift system, offering an excellent balance between performance, functionality, and value.

Features:

- Adjustable angle design in the head section from -55° to +45° and in the leg section from 0° to +75°
- Hi-Lo electric system operated via perimeter bar for foot control
- Sleek design with rounded structure legs for enhanced safety
- The head section features a face hole with a plug for maximum comfort in the prone position
- Fully enclosed base with a refined design that covers all technical components and facilitates cleaning
- Adjustable feet for uneven surfaces and silent wheels that ensure smooth and noise-free movement
- High-reliability TIMOTION motor
- Optimized maximum and minimum height, with a lifting range of 50.5 cm
- 5 cm thick padding with 36 kg/m³ density foam
- Upholstered in fire-retardant PVC vinyl compliant with BS 5852 standards, resistant to stains, mold, and wear (150,000 cycles)
- Load capacity: 250 kg
- Certification: CE certified and registered with the FDA in the United States
- Warranty: 1 year for the frame, electrical components, and upholstery (except for misuse).
